Art Unit: 2651

In response to applicant's amendments dated Aug. 21, 2001 and Nov. 16, 2001 and the Terminal Disclaimer dated June 25, 2002. The following action is taken:

1. Claims 26, 28-32, and 34-38 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Applicant amended all original claims 1, 7, 10, 13, 16 and 19 of patent number 5,235,581 to include limitations which were specifically added to overcome prior art rejections during the prosecution of that original patent. Such, newly added limitations included for example, "N optical heads, N being greater than or equal to 2"; objective lenses "whose aberration have respectively been corrected for said N disc substrates having different thicknesses"; "a plurality

of" photo detecting means, control means for "allowing" and control means ... "for providing said control signal to said selecting means and for allowing the light emitting means for" which have now been ~~are now~~ removed from the present application.. This constitutes an improper recapture of the claims, see Pannu v. Storz Instruments, Inc. 258 F.3d 1366, 59 USPQ. 2d 1597 (Fed. Cir. 2001).

Note: Applicant's required arguments to this rejection must include an explanation of all limitations deleted from each of the independent claims of the original patent, which had been added to establish patentability (e.g., added from the dependent claims to the independent claims).

Furthermore, certificate of correction is requested for the parent reissue application citing all related reissue applications.

Applicant is hereby reminded that the new supplemental declaration should meet the requirements set in the MPEP 1414.01.
